

SYSTEM FOR VISUALIZING INFORMATION IN A DATA WAREHOUSING ENVIRONMENT

ABSTRACT OF THE DISCLOSURE

5 According to the invention, techniques for visualizing customer data contained in
databases, data marts and data warehouses. In an exemplary embodiment, the invention
provides a system for graphically analyzing relationships in data from one or more data
sources of an enterprise. The system can be used with many popular visualization tools, such
as On Line Analytical Processing (OLAP) tools and the like. The system is especially useful
in conjunction with a meta-model based technique for modeling the enterprise data. The
10 enterprise is typically a business activity, but can also be other loci of human activity.
Embodiments according to the invention can display data from a variety of sources in order
to provide visual representations of data in a data warehousing environment.
